Volkan Abaoğlu
Computer Engineering Student

Hello, I'm Volkan, a computer engineering student, and I'm interested in web development, automation systems, and database management. I aim to define myself as a full-stack developer using React and Java technologies, and I'm working towards this goal. These days, I've been working on developing clone applications and trying to improve myself by sharing my code on GitHub. Additionally, I'm actively attending an English course to improve my language skills.

Education

2016-2020
Yavuz Sultan Selim Anatolian School

2020-2024
Suleyman Demirel University
Computer Engineering

Skills

- HTML
- CSS
- Javascript
- ReactJS
- NodeJS
- Java
- Git - Github
- Docker

Language

English - B2

Experience

03/2022 - 03/2023
Suleyman Demirel University IT Department
IT Technician

I worked as a part-time IT technician at my university for one year. During this period, I was involved in tasks such as network cabling, printer and scanner setups, computer repairs and assembly, remote support, and more.

07/2023 - 08/2023
Cubicl (Z Yazılım)
Software Developer Intern

During my internship, I worked on developing components for the integration of applications such as YouTube and Google Analytics into a web automation system called a saas app. Throughout this process, I utilized Typescript, NodeJS, and MongoDB. I collaborated on the project using Git and GitHub, gaining experience in areas like merging and rebasing, which were previously unfamiliar to me. I also wrote code related to authorization.

Certificates

TurkCell Geleceği Yazanlar
React 101 - 201 - 301 - 401

HackerRank
Javascript (Basic)

Cisco
CCNA: Introduction to Networks
Introduction to Cybersecurity
CyberOps Associate

Projects

Twitter Clone
I am currently developing a Twitter clone. The focus of this project is to recreate the main page of Twitter using React, HTML, and CSS. By working on this project, I aim to enhance my front-end development skills and gain a deeper understanding of component-based design.

Mekanbul
Mekanbul is a web application that displays nearby cafes along with their ratings and reviews. I developed it using HTML, CSS, and JavaScript technologies.
